

Somojit Banerjee

Cloud Security Architect | DevSecOps Engineer | Multi-Cloud Security

Mexico City, Mexico | somojitb@gmail.com | +52 446 292 5594 | +91 7908561292 | linkedin.com/in/somojit-banerjee-01/

PROFESSIONAL SUMMARY

Cloud Security Architect with 5+ years of experience securing enterprise cloud platforms across AWS, Google Cloud Platform (GCP), and Microsoft Azure. Strong background in DevSecOps, vulnerability management, IAM, cloud migration, Infrastructure as Code, and policy-as-code using Terraform, HashiCorp Sentinel, Azure Policy, and OPA/Rego. Experienced with CSPM and security automation platforms including Wiz, Prisma Cloud, Bridgecrew, Rapid7, Tenable.io, Burp Suite, and OWASP ZAP. Known for building secure-by-design cloud platforms, integrating security controls into CI/CD pipelines, and driving risk-based remediation aligned with CIS and NIST.

CORE SKILLS

Cloud Security	AWS security, Azure security, GCP security, IAM, WAF, zero trust, CSPM, CIS, NIST
DevSecOps	CI/CD security, Jenkins, shared libraries, secure SDLC, vulnerability remediation, automation
Infrastructure as Code	Terraform, HashiCorp Sentinel, Azure Policy, OPA/Rego, policy-as-code, guardrails
Platforms and Tools	Wiz, Prisma Cloud, Bridgecrew, Carbon Black, Rapid7, Tenable.io, Burp Suite, OWASP ZAP, Nmap
Cloud and DevOps	AWS, GCP, Azure, Docker, GKE, Apigee, Google App Engine, Cloudflare, Route 53, GitHub, Python, Bash

PROFESSIONAL EXPERIENCE

Global Payments Cloud Security Architect	Mexico City, Mexico Mar 2025 - Present
- Lead cloud security architecture and risk-based vulnerability remediation for AWS payment gateway infrastructure, resolving 500+ critical, 2,000+ high, and 5,000+ total vulnerabilities. - Designed and executed secure AWS migration patterns with zero-trust principles, IAM controls, compliance guardrails, and alignment to CIS and NIST frameworks. - Architected AWS WAF protections with 20+ custom rules to reduce exposure to OWASP Top 10 attacks, DDoS activity, API abuse, and application-layer threats. - Centralized security monitoring, audit logging, and compliance evidence using AWS CloudTrail, CloudWatch, and Aternity. - Designed DNS, SSL/TLS, traffic management, and reverse proxy architecture using Cloudflare, AWS Route 53, and Squid to improve application security and resilience.	
Global Payments Senior DevOps Engineer	Mexico City, Mexico May 2024 - Feb 2025
- Developed CI/CD pipelines and reusable Jenkins shared libraries for Apigee, Google App Engine, and Google Kubernetes Engine (GKE), improving deployment consistency and reliability. - Automated Carbon Black deployment and configuration across AWS environments using Python and Bash, reducing manual endpoint security operations. - Performed cloud compliance assessments and remediation using Wiz and Prisma Cloud to improve security posture against enterprise and regulatory requirements. - Automated cloud infrastructure and application delivery using AWS, GCP, Terraform, Jenkins, and DevSecOps practices. - Integrated security checks and controls into CI/CD workflows to strengthen release governance, scalability, and reliability.	
Tata Consultancy Services Limited DevOps Engineer	Queretaro, Mexico Aug 2023 - May 2024
- Designed Jenkins CI/CD pipelines to automate build, test, and deployment processes for cloud applications. - Automated infrastructure provisioning with Terraform to support consistent, repeatable, and scalable environment deployments. - Implemented AWS IAM policies, roles, and MFA controls to strengthen access management and cloud security posture. - Built and managed Docker container images and deployments for cloud-native workloads. - Supported AWS, GCP, and Azure infrastructure operations while promoting automation, continuous integration, and DevOps best practices.	
Tata Consultancy Services Limited Cloud Security Engineer	Queretaro, Mexico Sep 2022 - Jul 2023
- Implemented cloud security governance and Infrastructure as Code controls for enterprise environments using Terraform, HashiCorp Sentinel, Bridgecrew, and OPA/Rego. - Developed and enforced Azure native policies to maintain compliance with industry security standards and cloud governance requirements. - Designed security guardrails and feasibility assessments for a banking client, aligned with CSPM practices, CIS benchmarks, and cloud security best practices. - Created 400+ HashiCorp Sentinel policies to enforce policy-as-code security controls across cloud environments.	

- Provisioned and secured cloud services including GKE, virtual machines, VPCs, IAM, firewalls, load balancers, and VPNs using Terraform.

Tata Consultancy Services Limited

Vulnerability Management SME

Bangalore, India

Mar 2021 - Jul 2022

- Used Rapid7, Tenable.io, Burp Suite, OWASP ZAP, and Nmap to identify application and infrastructure vulnerabilities.
- Prioritized vulnerabilities by severity, exploitability, and business impact to accelerate remediation of critical risks.
- Produced vulnerability reports with remediation guidance and CVE references, partnering with application teams to reduce exposure and improve security posture.

EDUCATION

Asansol Engineering College

B.Tech, Electronics and Communication Engineering

West Bengal, India

2017 - 2021
